

## Mac User

Dear Learners,

Due to a system change at Adobe you may find that the enclosed **free** DVD does not function properly.

We have three possible solutions to the problem:

### 1. Free offer under hueber.de

We have created a free download that you can install quickly and simply. It replaces the DVD:

1. Download the latest version of Adobe Air under <https://get.adobe.com/air/>
2. Find the download to your Hueber course under <https://www.hueber.de/hilfe/downloads/>
3. Double-click on the download. The program will install on your Mac. You no longer need the DVD.

### 2. The solution recommended by Adobe

1. Download the latest version of Adobe Air under <https://get.adobe.com/air/>
2. Double-click on „ AdobeAir.dmg „ to install the latest installation program for Adobe AIR.
3. Go to the folder „/Programme/Dienstprogramme/“ / „ Programmes/Service programmes“.

4. Execute „Adobe AIR Application Installer.exe“ with administrator rights:

5. Press and continue to hold down the Cmd key (command key) and double-click on „Adobe AIR Application Installer“.

6. **It's important that you continue to press the Cmd key** until the Adobe dialog box „Adobe AIR Application Installer“ appears on your screen.

7. Insert the Hueber CD-ROM or DVD.  
8. Double-click on the .dmg file  
9. Click on the file „install.air“.  
The App should now install successfully.

### 3. Change the system time

Change the **system time** on your device back to a date before **1st November 2017\***

Make sure that you are registered as **Administrator** on your Mac.

1. Choose „Apple“> „Systemeinstellungen“ / „System settings“
2. Click on „Datum & Uhrzeit“ / „Date and time“. Deactivate „Datum und Uhrzeit automatisch einstellen“ / „Set date and time automatically“.
3. You can now select a date before 1.11.2017, e.g. 2.10.2017
4. Click on „Sichern“ / „Save“.
5. Install the application anew.
