

Student's Book

Language Hub

Language Hub is a six-level General English series spanning the Common European Framework of Reference for Languages (CEFR) from levels A1 to C1. Language Hub offers a skills syllabus and covers listening, speaking, reading and writing, with vocabulary, grammar and pronunciation.

The CEFR

The CEFR is an international standard which aims to provide a transparent, coherent and comprehensive means of describing language ability. It describes what language learners can do in different skills across six broad levels, from A1 to C2, with some of these levels being further broken down into sub-levels (e.g. A2 can be subdivided into A2 and A2+). It consists of a set of scales containing descriptors indicating what a learner can do in that context.

Originally published in 2001, the CEFR was extended in 2017 and now includes an expanded list of descriptors to describe language ability at different levels. The CEFR mapping for Language Hub was carried out using the 2017 extended set of descriptors, a copy of which is freely available on the Council of Europe website: <https://rm.coe.int/cefr-companion-volume-with-new-descriptors-2018/1680787989>

How to use the Language Hub CEFR maps

There are two versions of CEFR maps in this document. Both versions contain the same mapping information in different formats – it is up to you which version you want to use.

Version 1 is organised by the CEFR scales and descriptors, which allows you to browse the mapping document from a CEFR point of view. So, for example, you first identify the relevant scale and descriptor you are interested in and then can see which course learning outcomes map to that descriptor, as well as their location in the book.

Version 2 is organised unit by unit, which allows you to browse the course learning outcomes chronologically. These are mapped to the relevant CEFR descriptor(s), and the CEFR Ref column indicates which of the scales the descriptor is taken from – a table summarising the CEFR scales and their references is provided at the start of Version 2.

For both versions, it is important to note that only relevant CEFR scales and descriptors have been included. On some occasions, no suitable CEFR descriptor was identified for a particular learning outcome. All descriptors included are at or within one band of the target level of the book.
